About Me

Proactive and result-oriented Graduate with skills in data analysis, data visualization, process optimization, web design, and penetration testing. Possess a strong analytical mindset with sound judgment, which is essential for making decisions in a dynamic ICT world. Excel at organizing and coordinating tasks to produce efficient and optimized procedures. Have exceptional skills in communication, which would allow me to communicate technical ideas and collaborate effectively with others. Am interested in making use of my skills within the ICT sector to make a difference.
